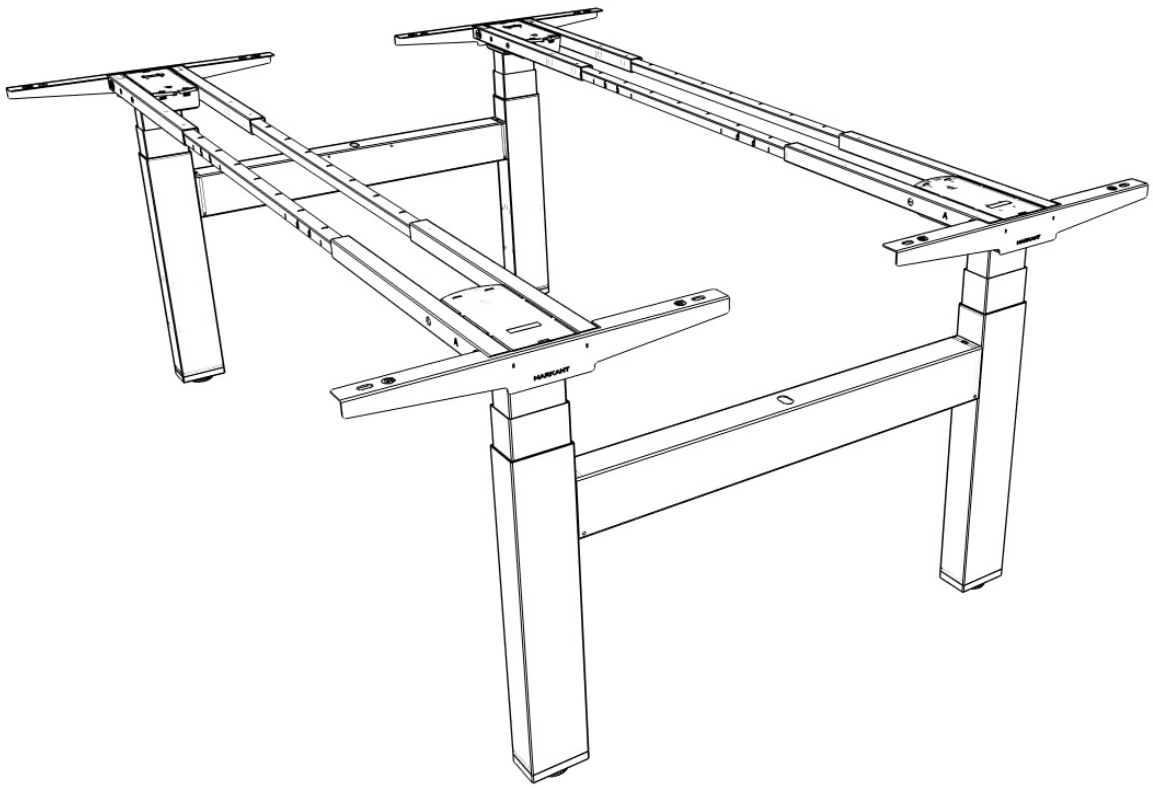
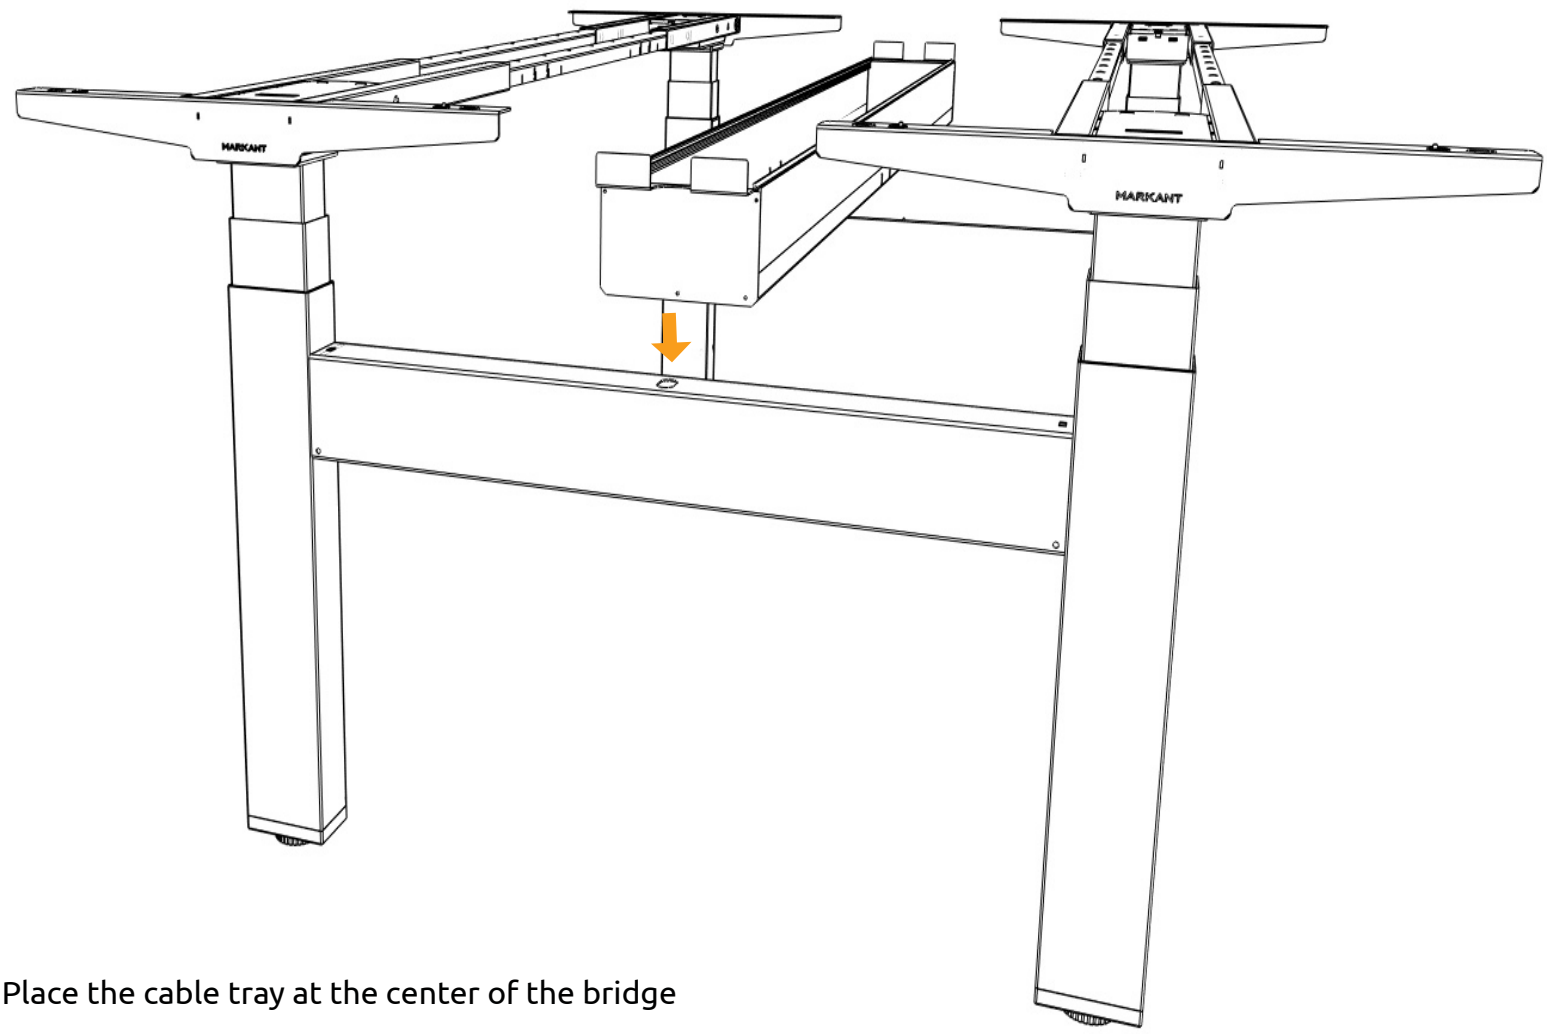
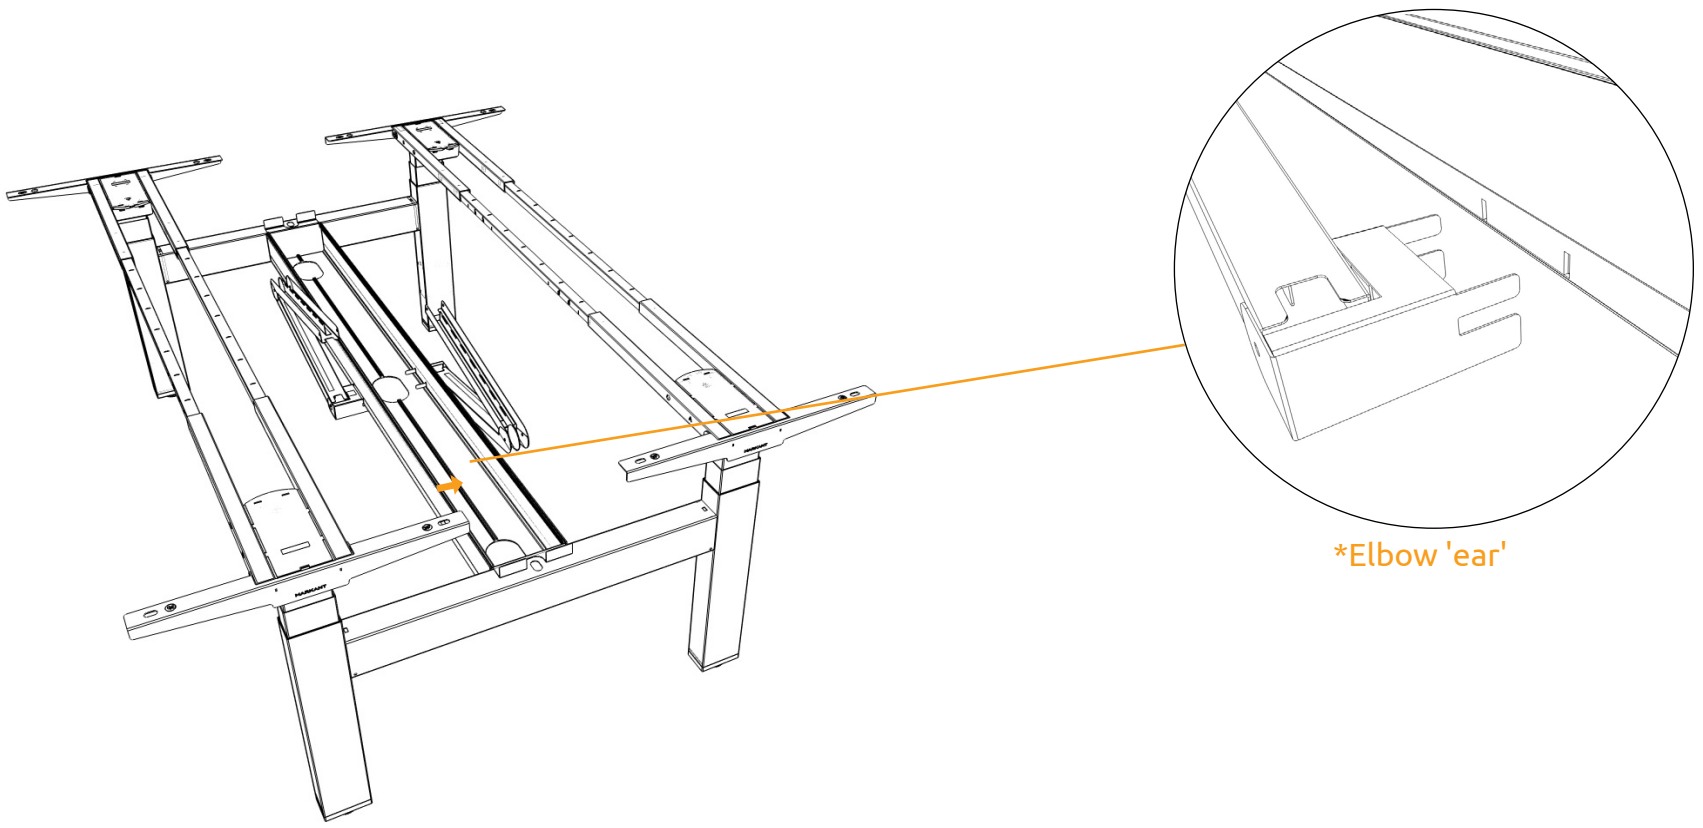
MATRIX PRO CABLE TRAY WITH ELBOW



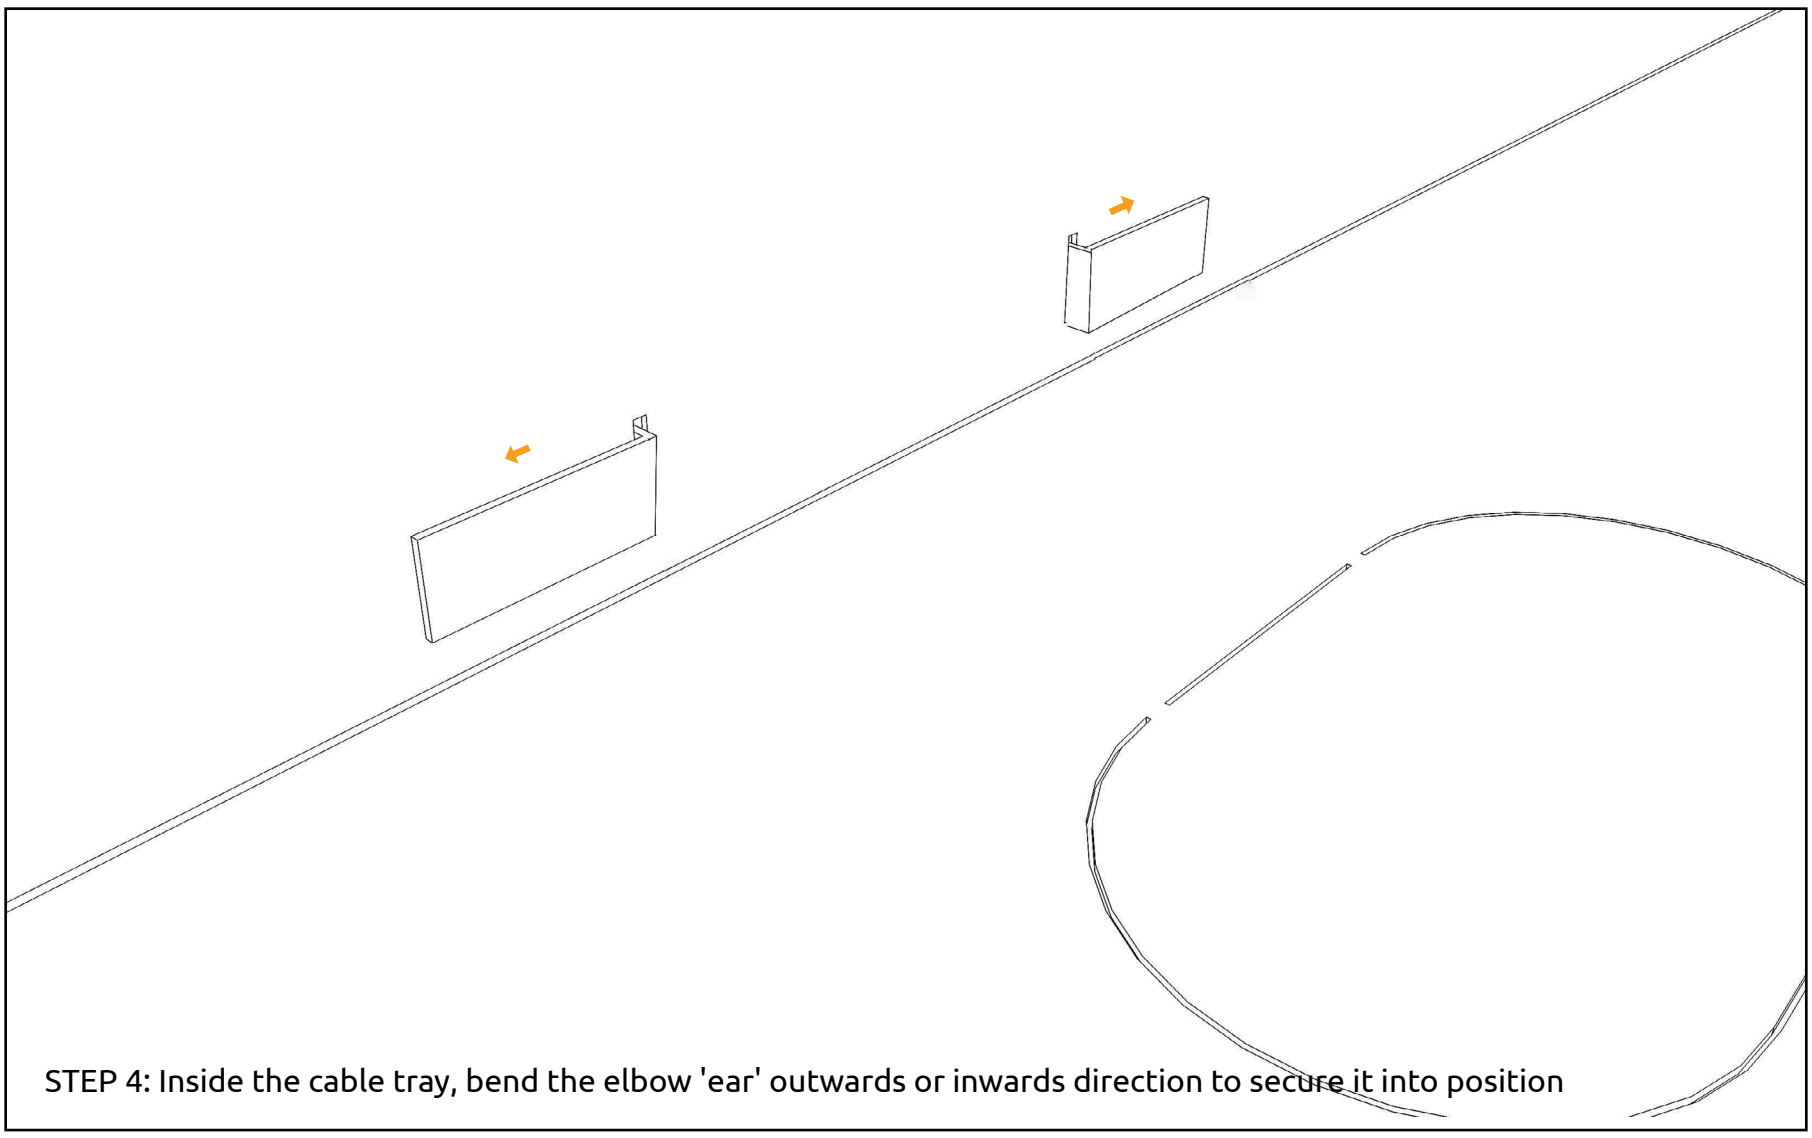
STEP 1: Matrix Pro combi desk has been assembled according to the size



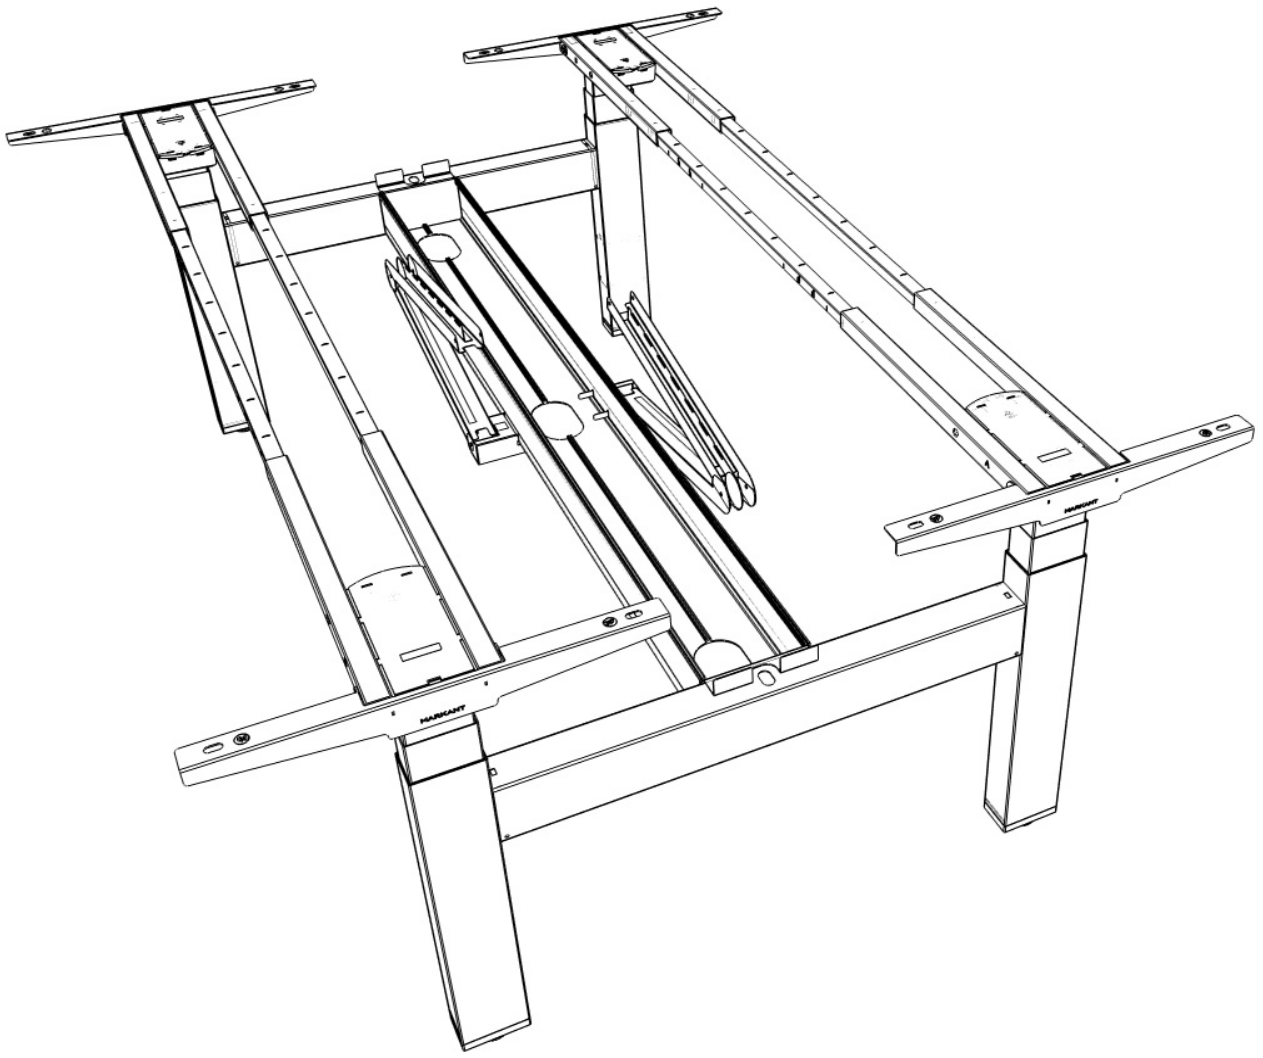
STEP 2: Place the cable tray at the center of the bridge



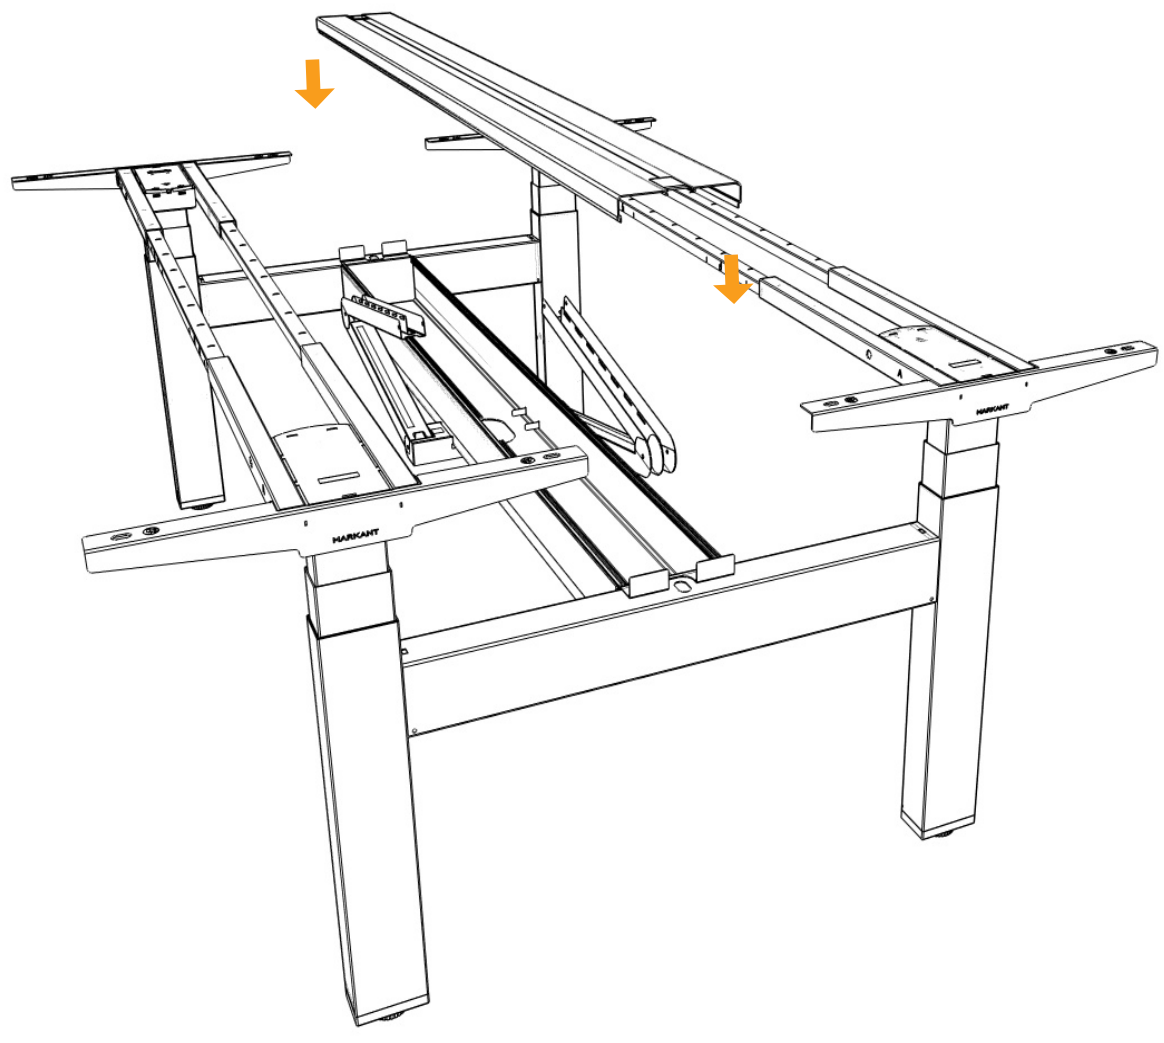
STEP 3: Then slot in the elbow 'ear' into the cable tray's cut out



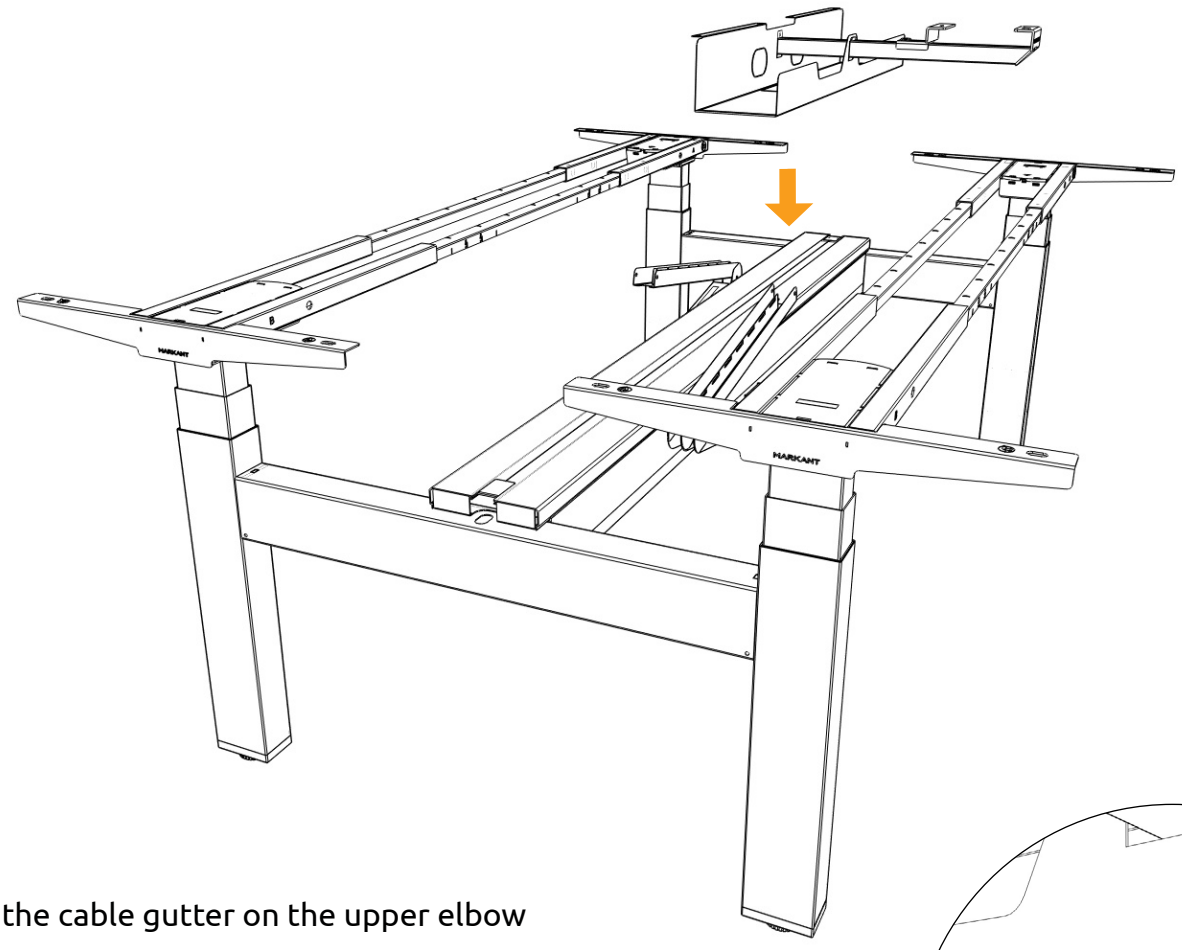
STEP 4: Inside the cable tray, bend the elbow 'ear' outwards or inwards direction to secure it into position



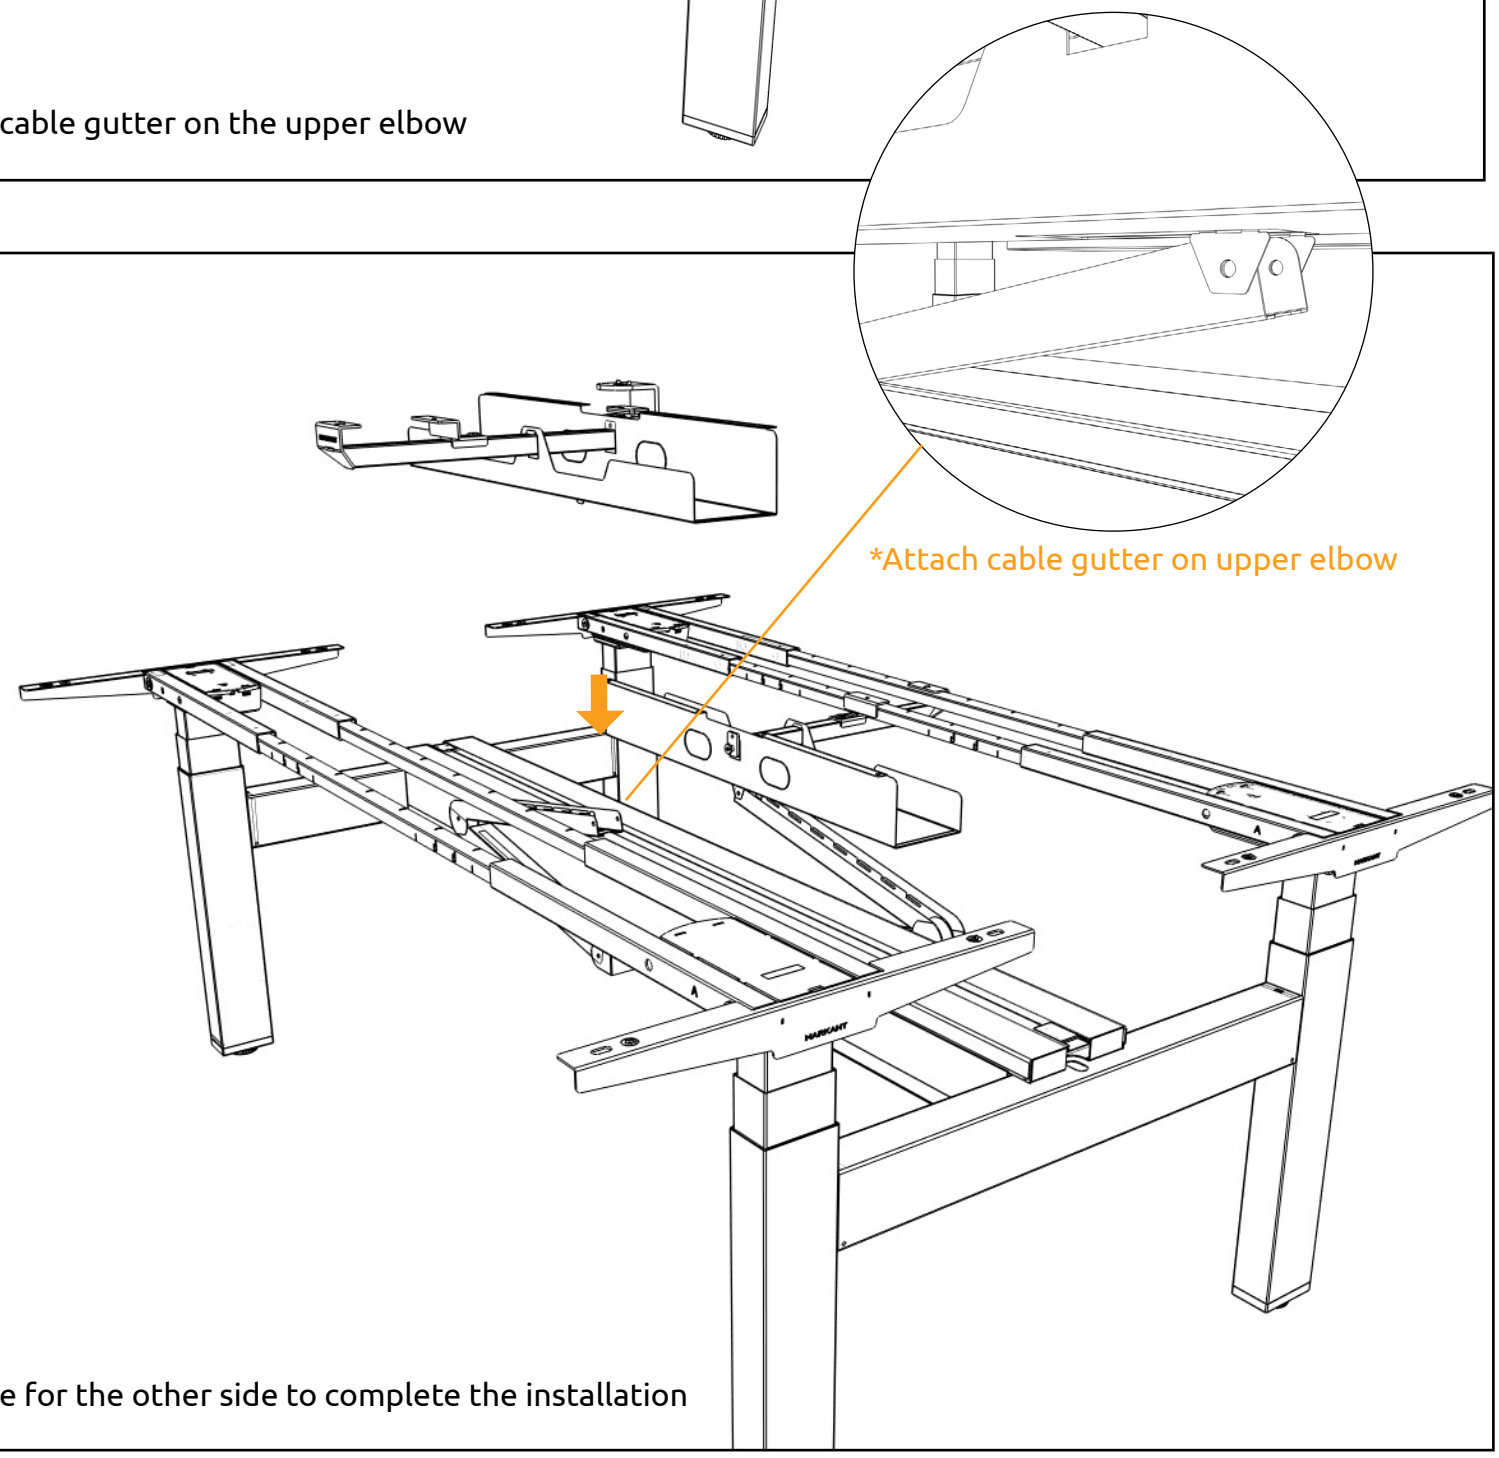
STEP 5: Do the same for the other side



STEP 6: Place the cable tray lid on top of cable tray

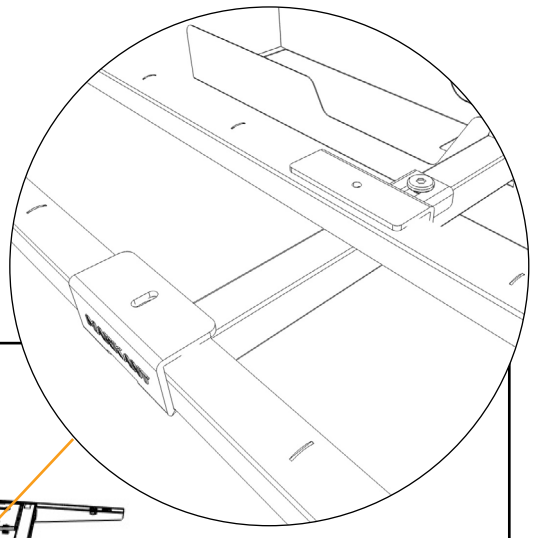


STEP 7: Attach the cable gutter on the upper elbow

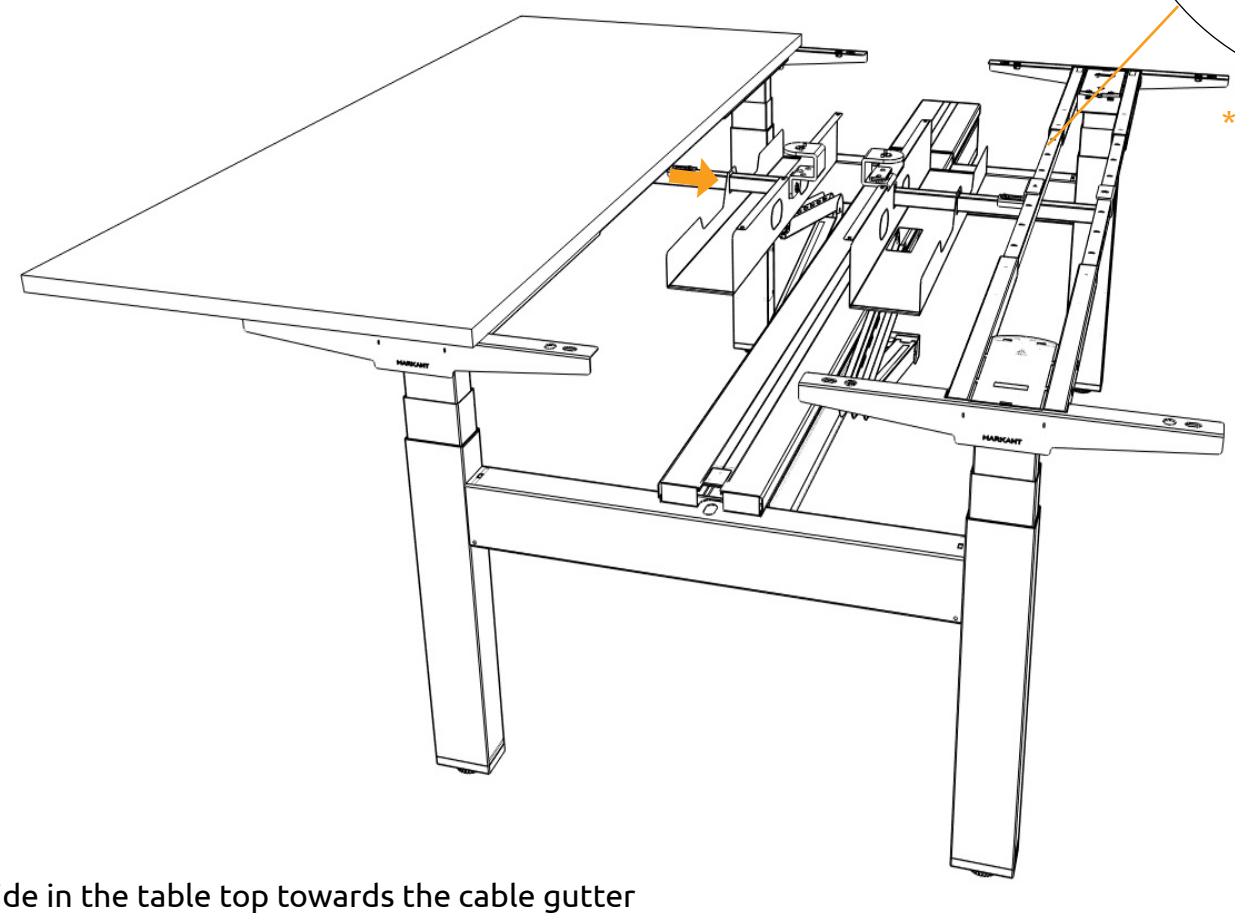


STEP 8: Do the same for the other side to complete the installation

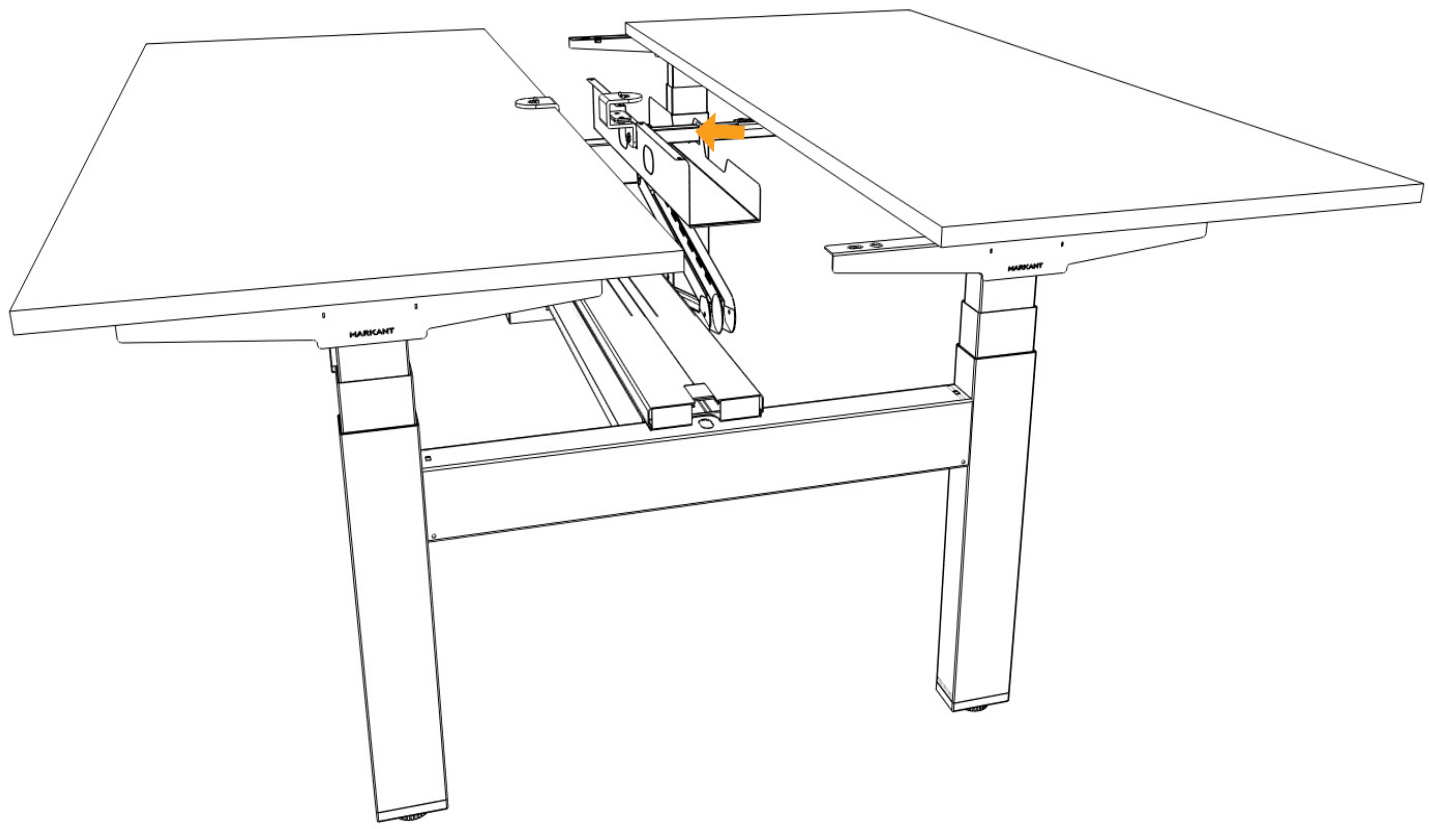
MATRIX PRO TABLE TOP



*Install the smart holder bracket by sliding and lock the screw with M5 allen key

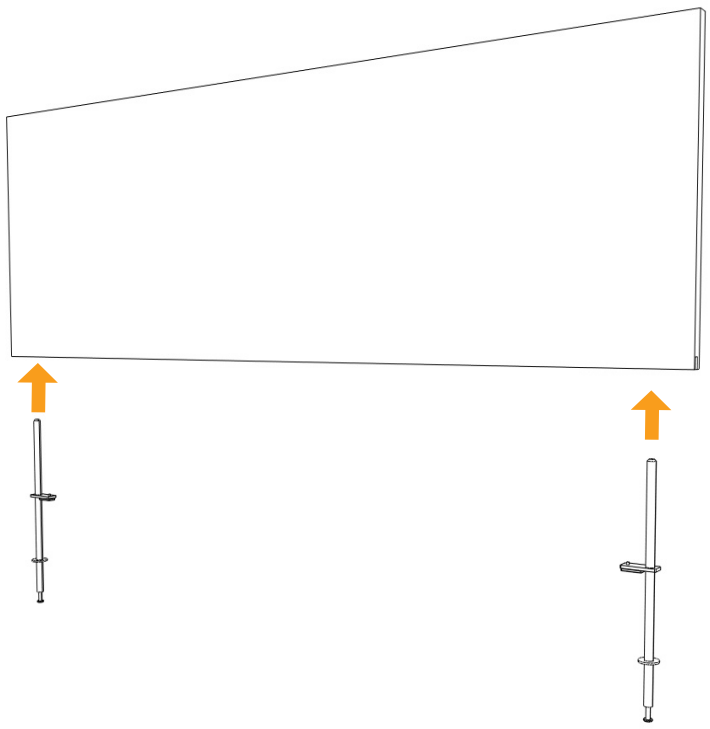


STEP 9: Slide in the table top towards the cable gutter

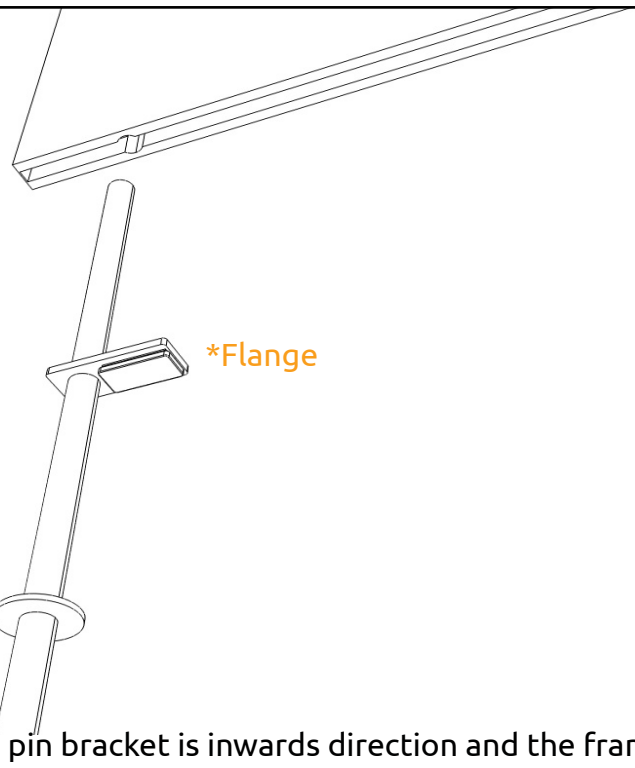


STEP 10: Do the same for the other table top

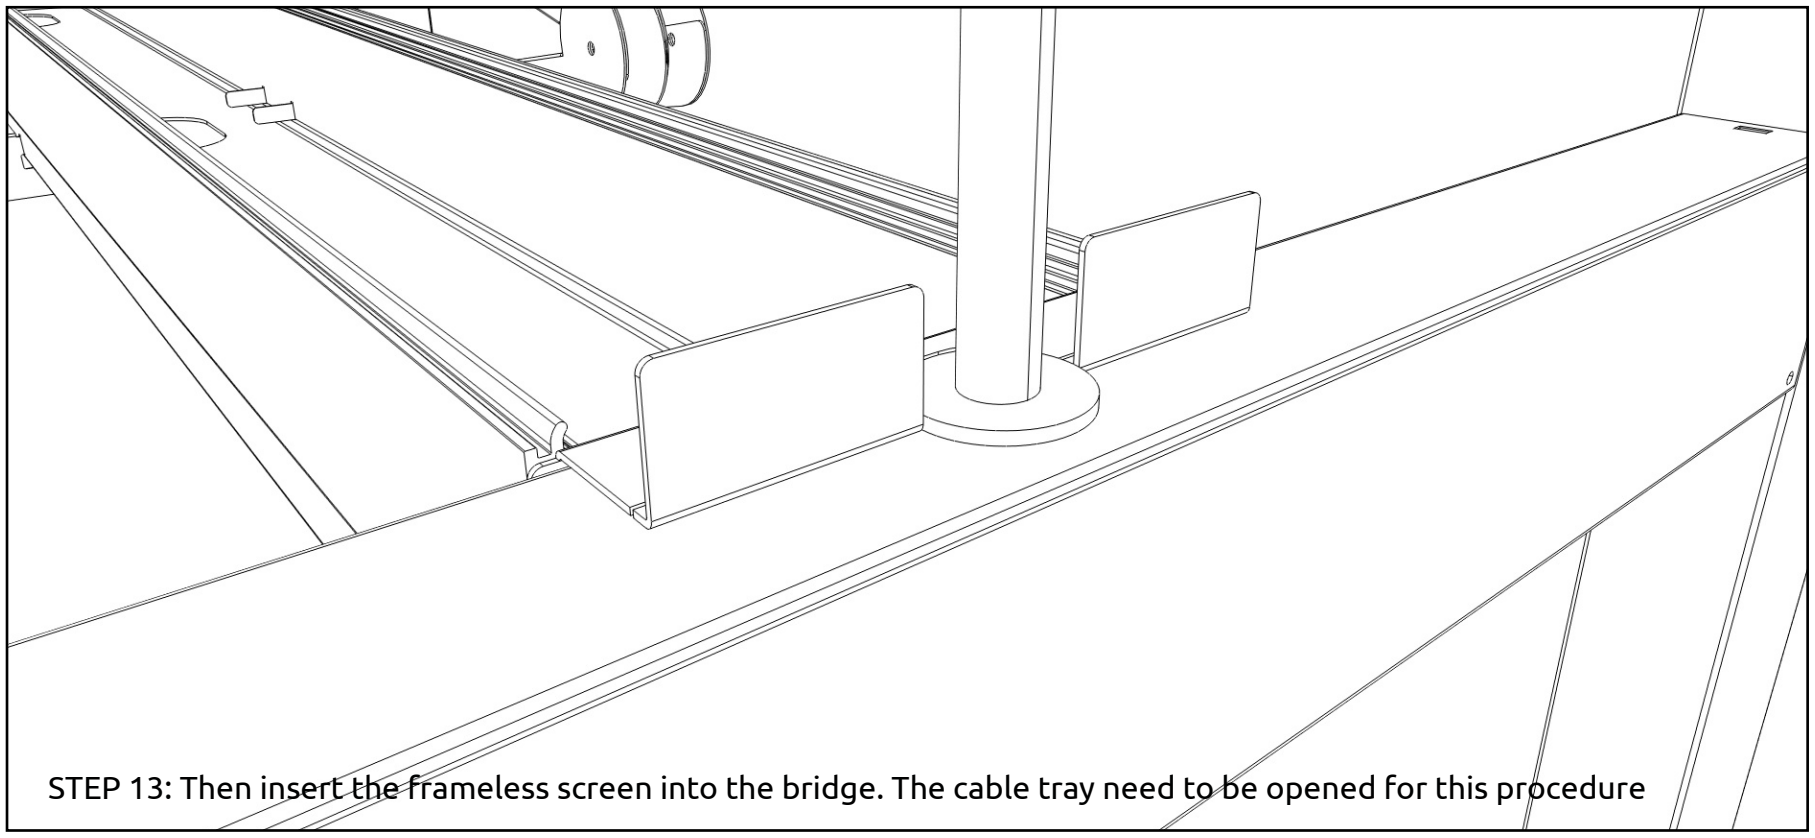
MATRIX PRO FRAMELESS SCREEN BRACKET



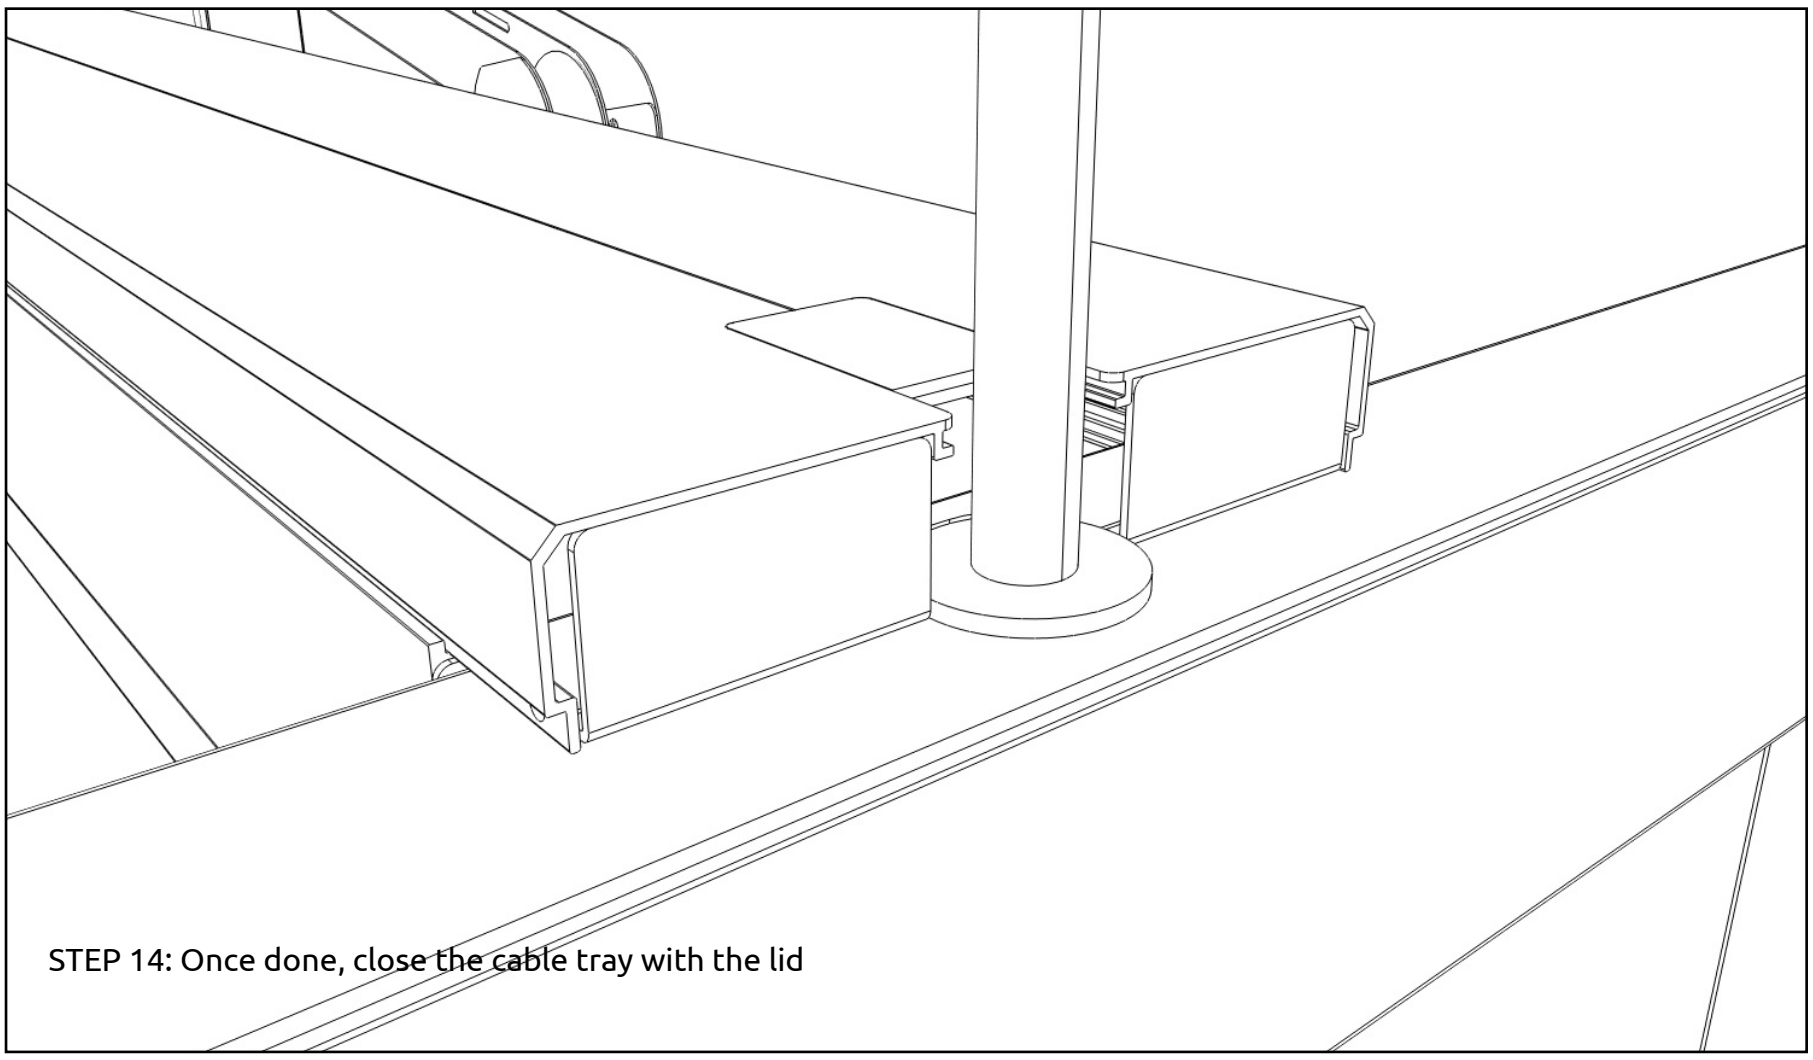
STEP 11: Insert pin bracket into the bottom hole of a frameless screen each for left and right side



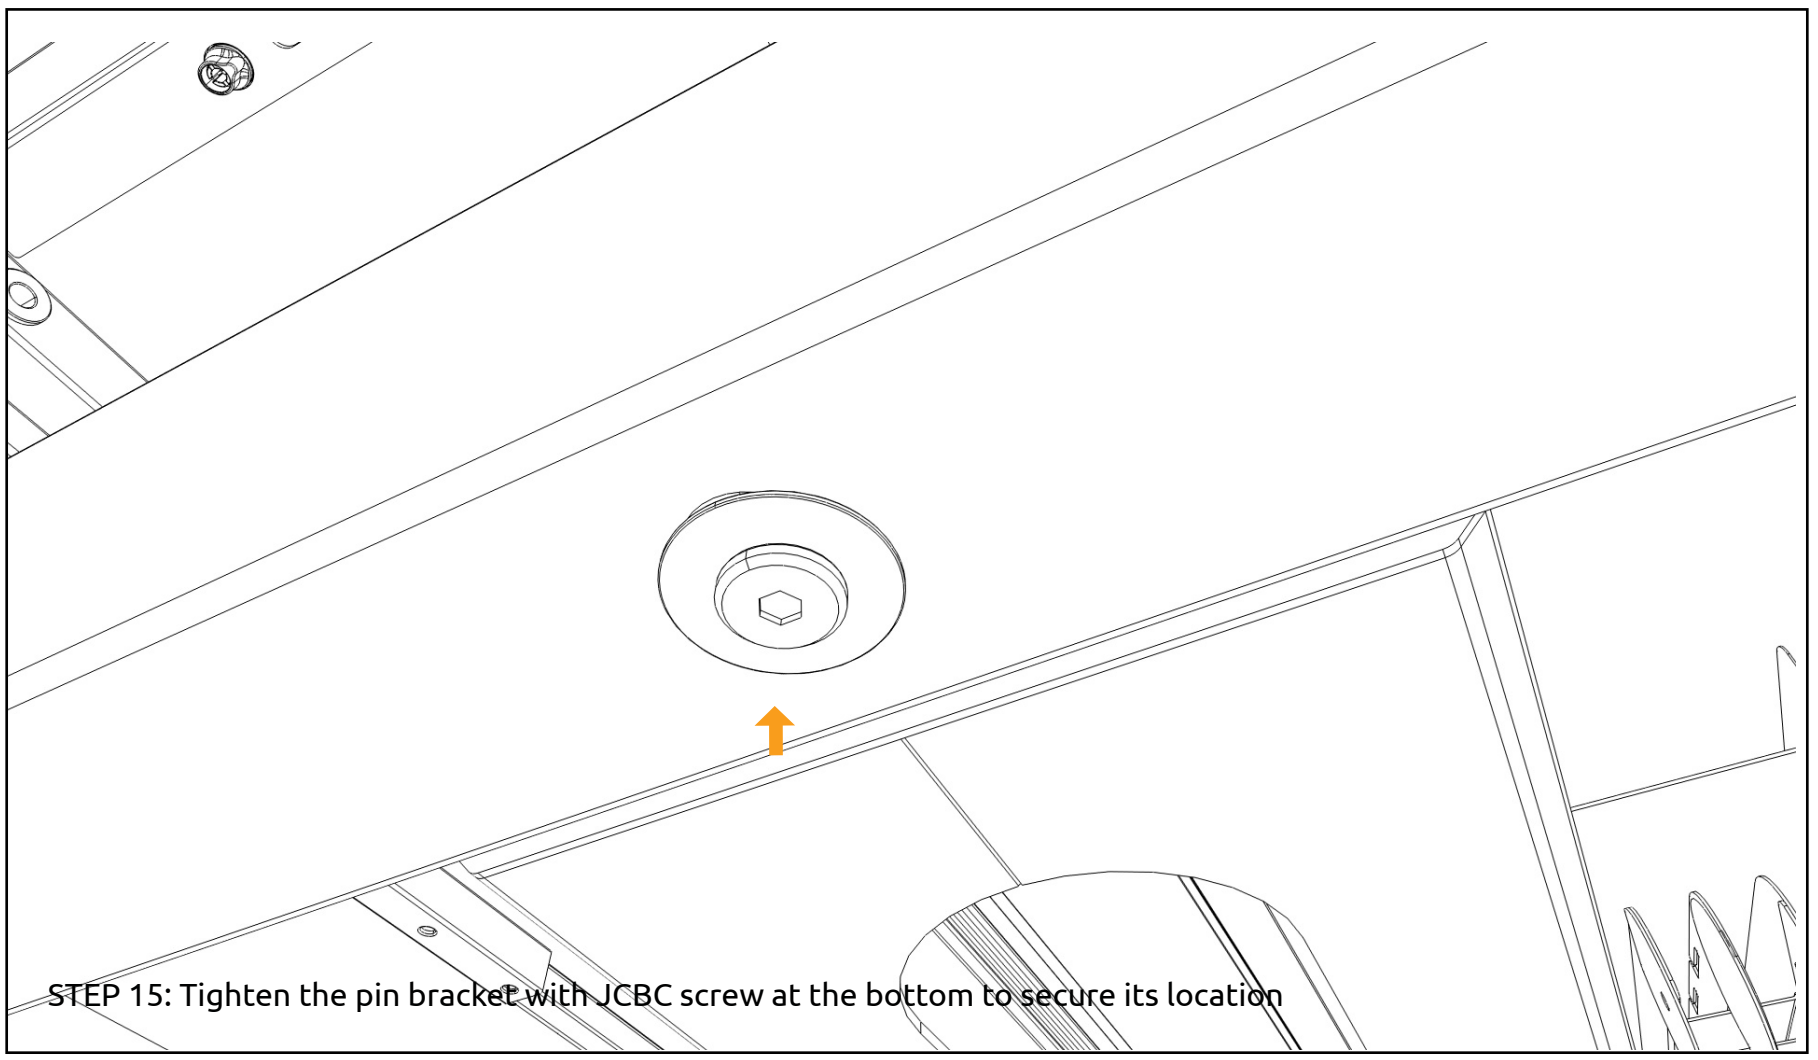
STEP 12: Ensure that the flange of the pin bracket is inwards direction and the frameless screen need to place in perpendicular



STEP 13: Then insert the frameless screen into the bridge. The cable tray need to be opened for this procedure

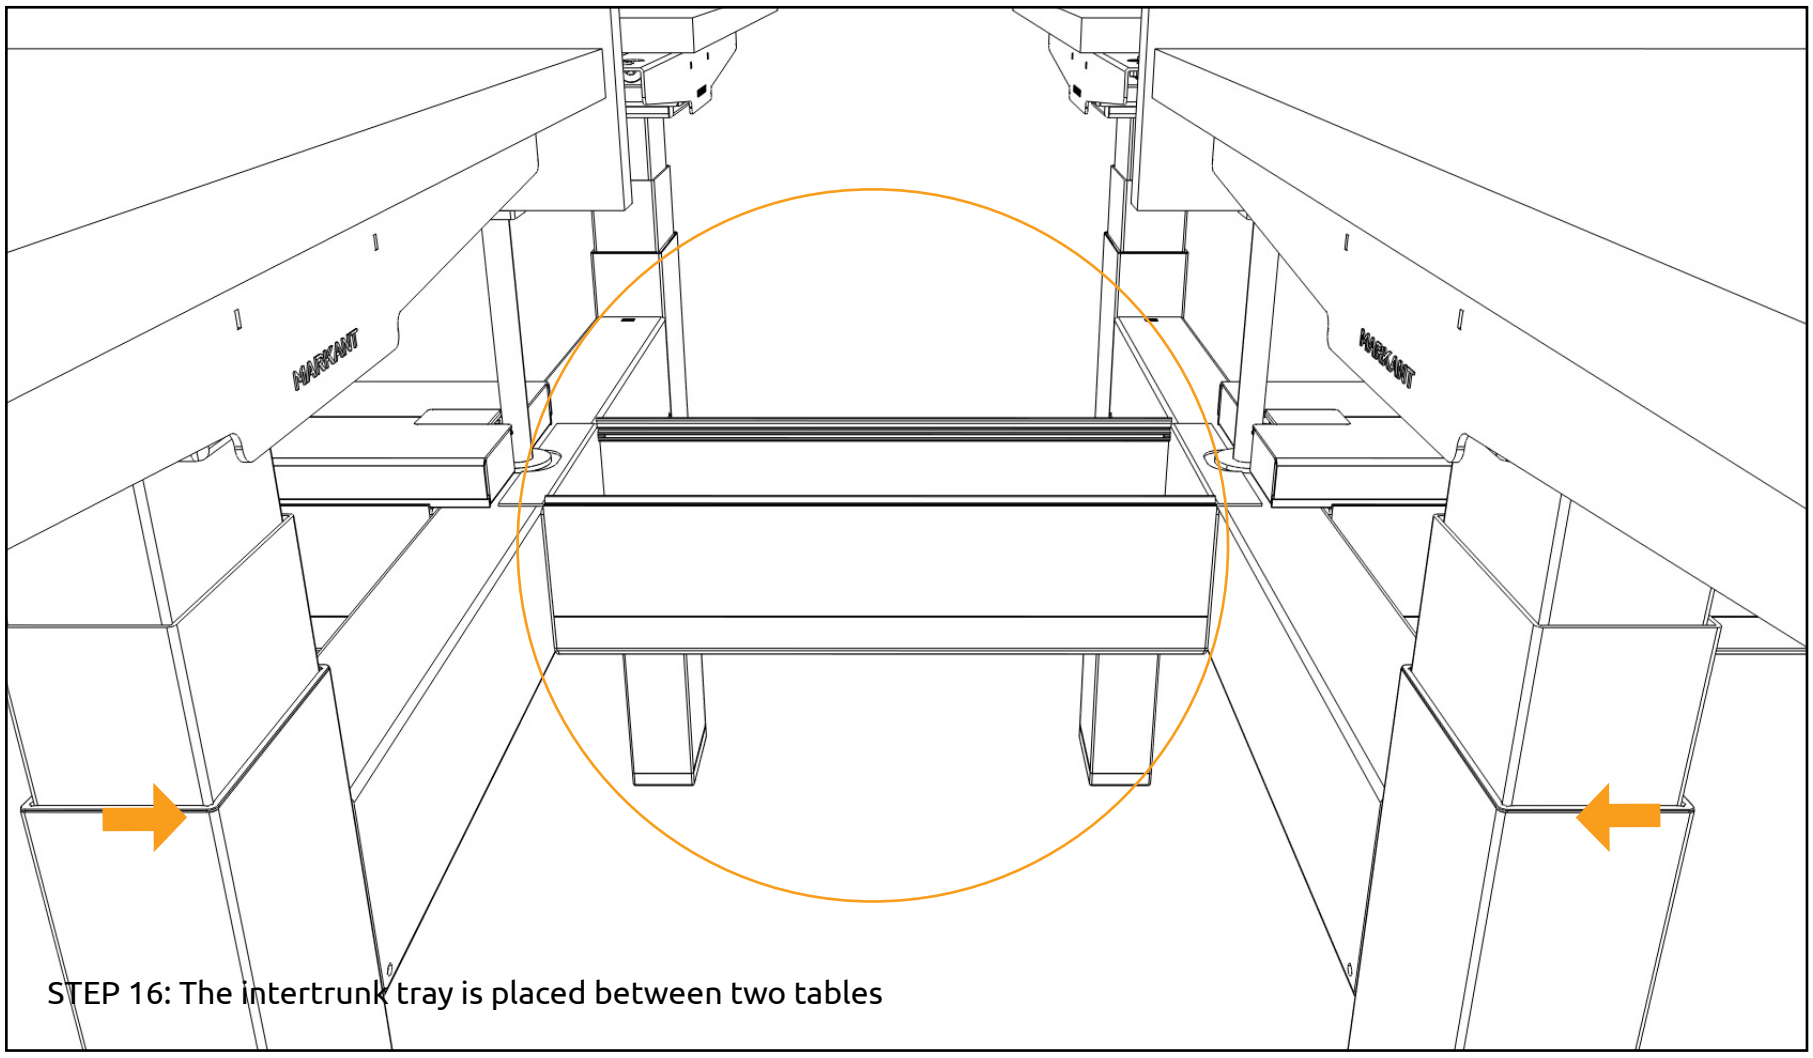


STEP 14: Once done, close the cable tray with the lid

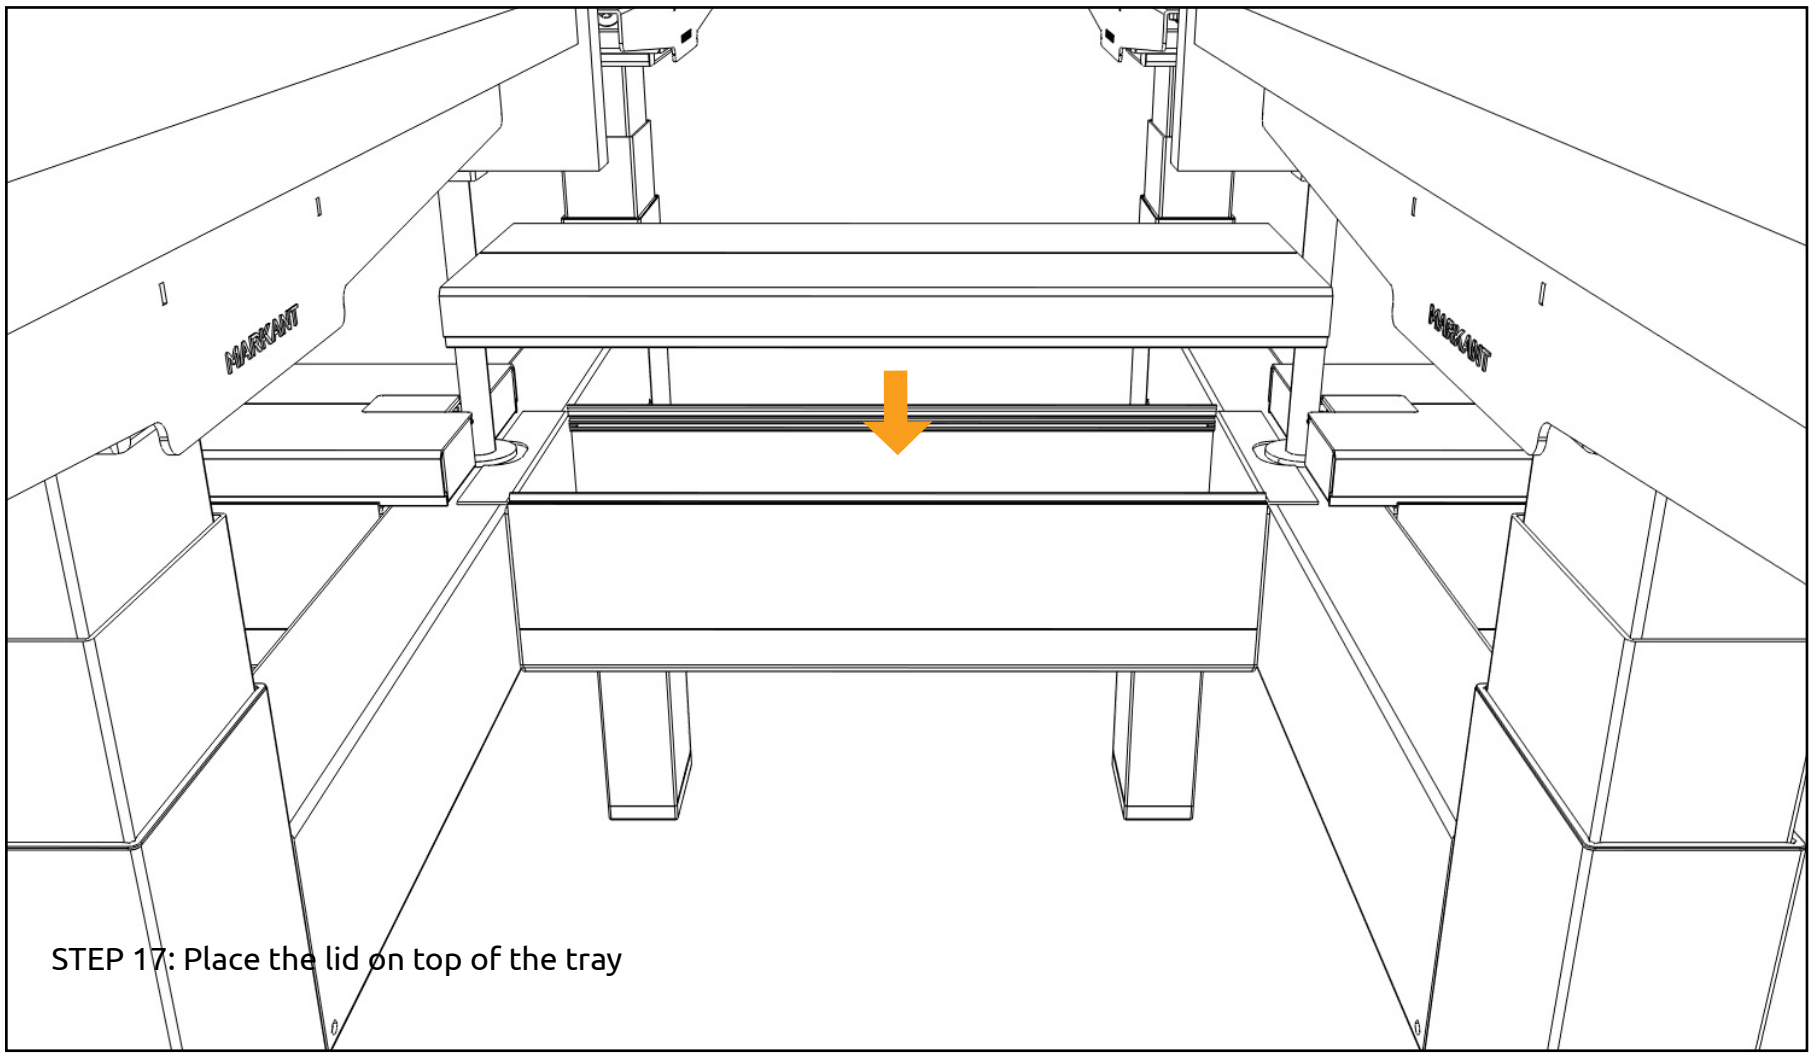


STEP 15: Tighten the pin bracket with JCBC screw at the bottom to secure its location

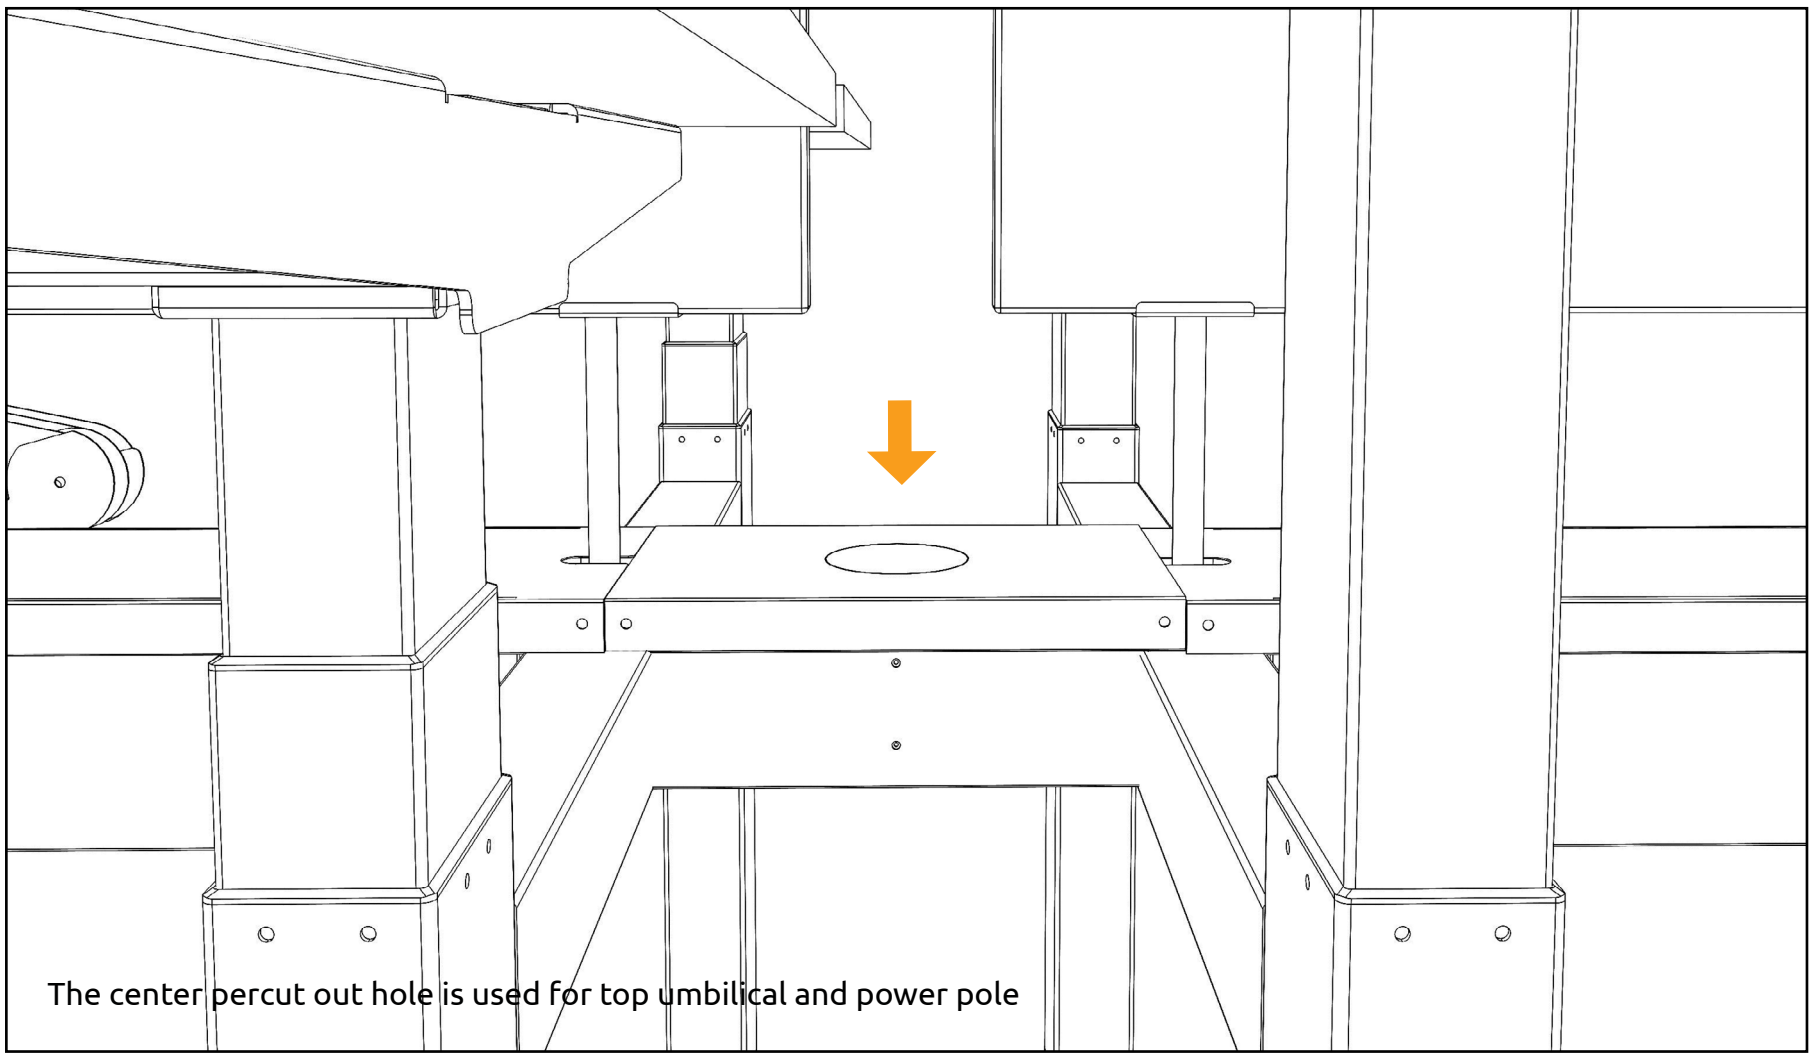
MATRIX PRO INTERTRUNK & INBETWEEN LID
(OPTIONAL)



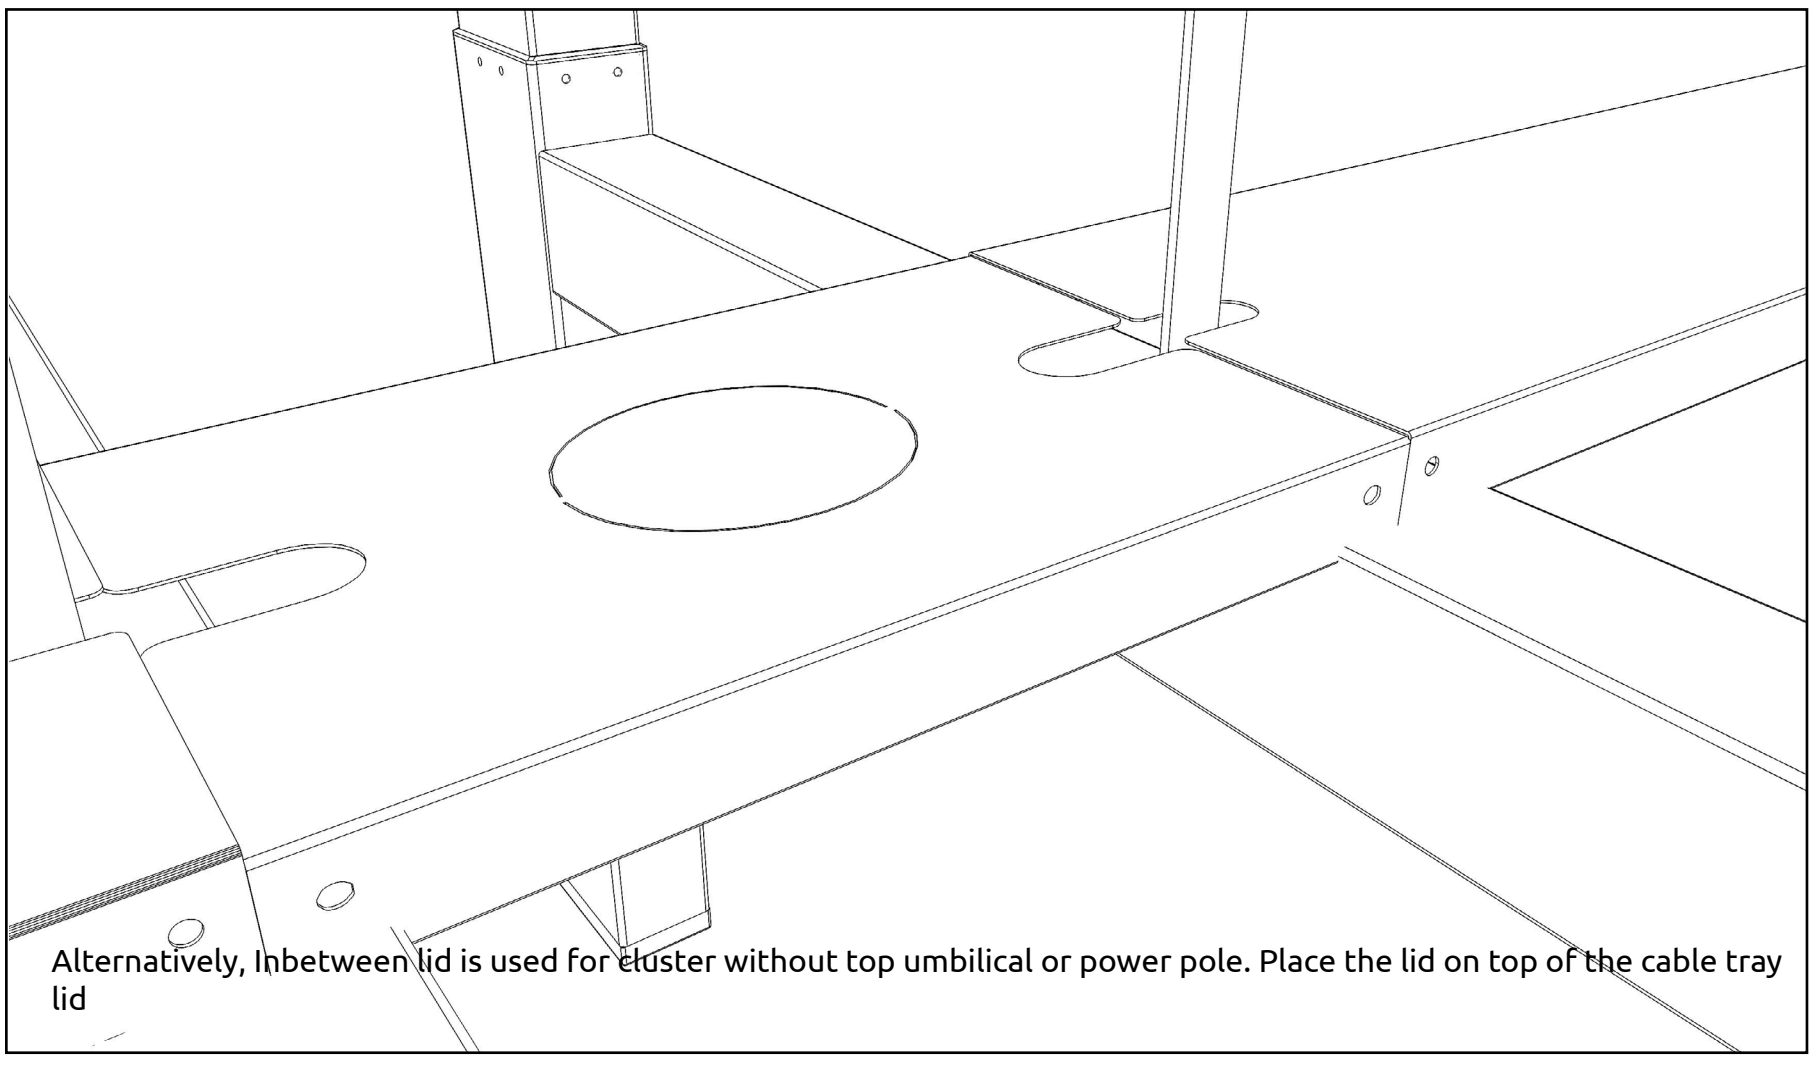
STEP 16: The intertrunk tray is placed between two tables



STEP 17: Place the lid on top of the tray



The center percut out hole is used for top umbilical and power pole



Alternatively, Inbetween lid is used for cluster without top umbilical or power pole. Place the lid on top of the cable tray lid
